

Get brands cited by AI.

The closed-loop GEO platform. Citora tracks how ChatGPT, Claude, Gemini and Perplexity answer, then helps a brand get mentioned and cited.

Customers stopped scrolling search results. They ask AI, and AI picks the brand.

PROBLEM

There is no 7th place in an AI answer.

GOOGLE SEARCH · A LIST

AI ANSWER · ONE PARAGRAPH

"For tracking brand visibility in AI search, three tools come up most often. Each shows which sites the AI cites and which brands it names..."

Not in the paragraph? Then you do not exist.

Can't see it. No rankings, and the answer changes every time.

Can't find it. No idea which questions customers actually ask.

Can't hit it. No way to tell whether AI ever read your content.

Citora asks four AI engines what your customers ask, and shows who gets picked.

ASK AI · “WHICH TOOLS TRACK MY BRAND IN AI ANSWERS?”

	ChatGPT	Mentioned ×3
	Claude	Mentioned ×2
	Gemini	Not mentioned
	Perplexity	Mentioned ×1

TWO SIGNALS PER ANSWER

Mentioned

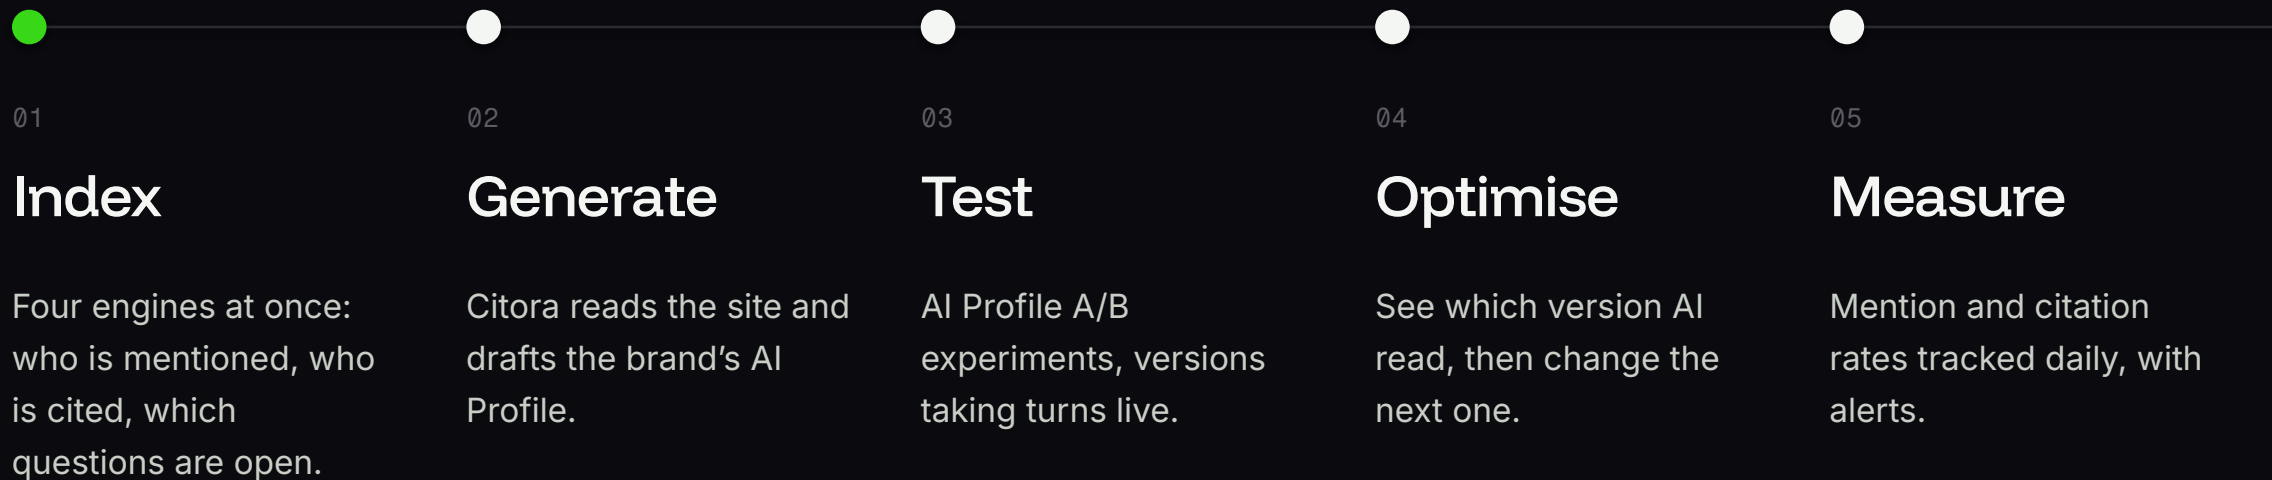

The answer names your brand.

Cited

The AI read your website while it gathered sources.

Illustration of the live Ask AI screen. Every element maps to a real feature.

Most GEO tools stop at a report. Citora runs the whole loop.

Each round starts from the last round's results. GEO methods lifted visibility in AI answers by up to 40% in a controlled study (Aggarwal et al., Princeton / IIT Delhi, KDD 2024).

Ads in ChatGPT, aimed with the mention and citation data Citora already has.

01

Read

How AI describes the brand, where it is left out, which questions are open.

02

Choose

The conversations worth placing ads against.

03

Place

Ads in ChatGPT Free and Go, placed through Citora.

04

Measure

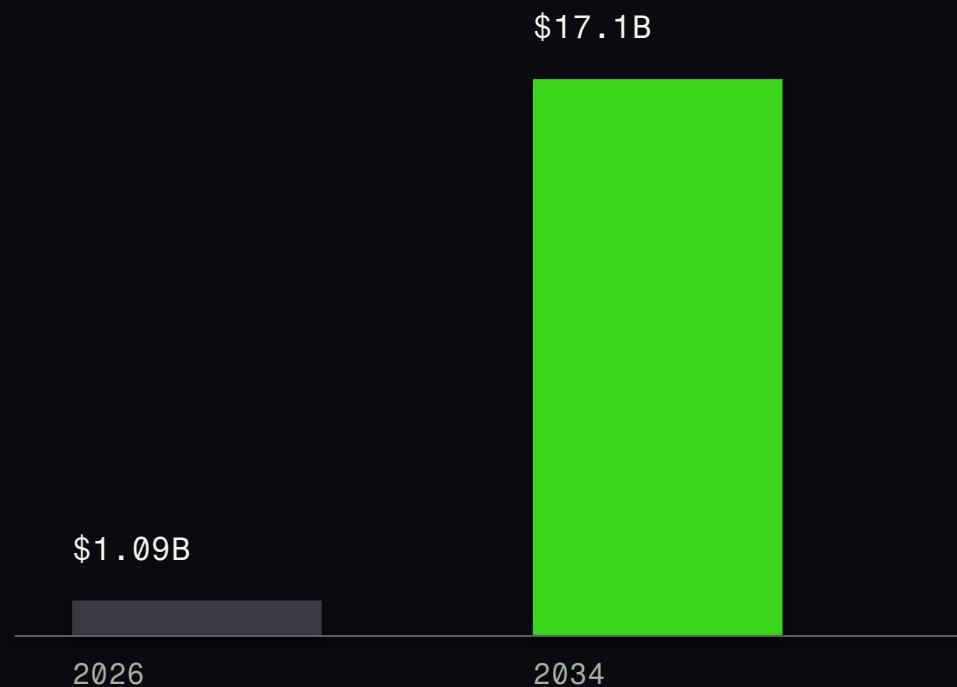

Ad results tracked in the same loop as mentions and citations.

Earned and paid visibility, managed together. Ad budgets on Citora will be paid in \$CIT.

GEO is a new budget line,
growing about 40% a year.

\$17.1B

projected global GEO market in 2034,
from \$1.09B in 2026, 40.6% CAGR

Source: Dimension Market Research, GEO Market Outlook 2026 to 2034. Estimates vary by research house.

Five revenue lines. All of them paid in \$CIT.

LINE	WHAT THE BRAND PAYS FOR	HOW IT IS PAID
Platform usage	Ask AI runs, tracking, health checks, AI Profiles and A/B tests	Pay per use
Ad budgets	Ads in ChatGPT, planned and placed through Citora	Ad spend
KOL campaigns	Creators AI already cites, matched and booked through Citora	Campaign fee
Managed GEO	Our team runs the full loop for larger brands	Monthly retainer
Agency packages	Agencies buy \$CIT in bulk to serve their own clients	Bulk purchase

Next: industry reports on which brands AI recommends, and API access to our mention and citation data.

Prices are set in USD and paid in the matching amount of \$CIT.

One token for every spend on Citora. Using the product means using \$CIT.

Search and analysis

Ask AI across 4 engines, health checks, daily tracking runs.

AI Profile and A/B experiments

Generate the brand profile, then test versions live.

ChatGPT ad budgets

Ad spend planned and placed through Citora.

KOL campaigns and managed GEO

Creator campaigns and full-service GEO, paid in \$CIT.

Brands buy \$CIT → spend it on Citora → get seen in AI answers → results bring more brands

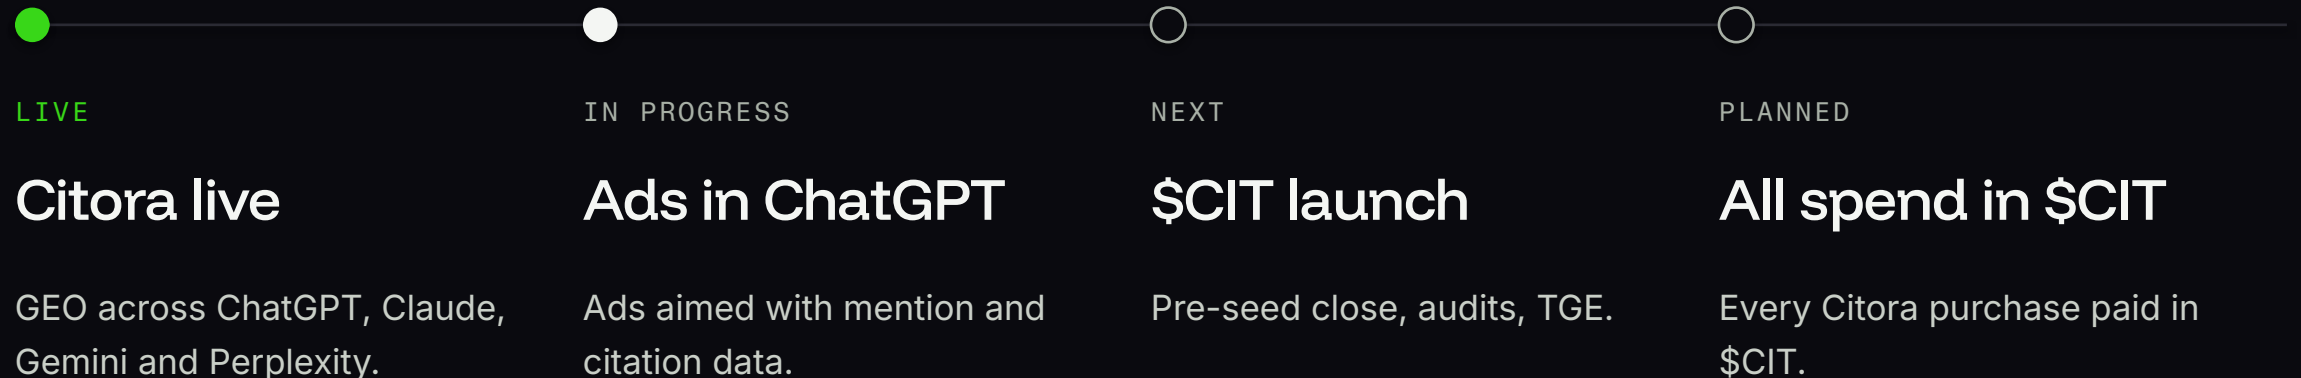

100 million \$CIT.

TICKER	TOTAL SUPPLY	TGE
\$CIT	100,000,000	In 4 to 6 months

GROUP	SHARE	TOKENS	USED FOR
● Ecosystem	30%	30,000,000	Brand incentives, partner programs and grants
● Investors	25%	25,000,000	Pre-seed and future funding rounds
● Team	15%	15,000,000	Core contributors building Citora
● Treasury	15%	15,000,000	Long-term operations and reserves
● Community	8%	8,000,000	Airdrops, campaigns and creator rewards
● Liquidity	5%	5,000,000	Exchange liquidity at TGE
● Advisors	2%	2,000,000	Strategic advisors

From live GEO platform to token economy.

AI infrastructure, Web3 and growth, under one roof.

CEO · AI & WEB3
